INVITATION FOR BID NO. GSA/PAG-009-16
VOIP TELEPHONE SERVICES
April 19, 2016

Question submitted by Pacific Data Systems dated April 13, 2016

Inquiry 1: Regarding the specifications for the ISDN/PRI services, kindly clarify if the T1 circuit to be used to transport the ISDN/PRI service needs to be delivered using a dedicated channel Circuit Based network provisioning. This is the normal case with all of our PRI services. Some local carriers use Packet Switching network provisioning which may not provide consistent levels of service to meet the ISDN/PRI requirements.

Response: For clarification, the Port Authority of Guam will only accept Circuit Switching Network for the PRI services.
