November 17, 2026

Invitation For Bid
GSA-002-27
Law Enforcement Lights, Siren and PA (IDIQ)

Questions and Concerns Received from JMI EDISON on November 12, 2026.

1. Additional Product Specifications
   Could you please provide any additional specifications or technical requirements for the lights, sirens, and PA systems? Any further details regarding performance standards, configurations, or required features would be greatly appreciated.
   Response: The required system shall include blue and blue/white LED emergency warning lights, a 100-watt electronic siren/public address system with handheld controller, a 100-watt siren speaker, suitable mounting hardware, an 800 MHz glass-mounted antenna, electrical protection, wiring, and installation materials. Equipment shall be compatible with the applicable pickup trucks or van, professionally installed, and tested for proper operation. Equivalent equipment meeting the stated functional requirements is acceptable.

2. Lighting System Configuration
   Based on our review of the solicitation specifications, we understand that the requirement does not include a traditional roof-mounted lightbar. Instead, the lighting configuration appears to consist of LED perimeter lighting modules installed in the front grille and rear of the vehicles.

   Could you please confirm whether our understanding is correct, or advise if roof-mounted lightbars or any additional lighting components are required?
   Response: The referenced equipment configuration uses individual LED warning-light modules, NOT a traditional roof-mounted lightbar. Exact mounting positions for front, rear, side, and interior modules are subject to agency acceptance.

3. Required Delivery Date
   The solicitation specifies a required delivery timeframe within 30 days of award.

   Considering the procurement, shipping, and installation lead times associated with the required equipment, we respectfully request consideration of an extension to the delivery schedule.

   Specifically, we request that the required delivery date be extended to 8–10 weeks from the date of Purchase Order issuance. This extension would allow sufficient time to procure the necessary

equipment, coordinate shipping, and complete the required installation while ensuring compliance with the solicitation requirements.
Response: Refer to Amendment #2, "90 Days Upon Receipt of Purchase Order."

4. Quantities for Each Line Item / Number of Vehicles We noted that the quantities for each line item are not specified in the solicitation. Could you please confirm the required quantities for each line item – the total number of vehicles included in this requirement?

   This information is essential to ensure accurate and competitive pricing. Additionally, confirmation of the quantities would allow us to explore potential volume-based pricing with our suppliers, which may result in more favorable pricing for the Government.
   Response: The quantities reflected in the Bid Form represent the minimum quantities. Refer to page 5 of 52 "This is an "Indefinite Quantity Bid" pursuant to Section 3119(i)(2) of the 2 GAR Procurement Regulations. The quantities reflected are estimated requirements projected within a twelve (12) month period. These amounts may increase during the term of this bid. However, regardless of the fluctuations of quantities, this bid shall be subject to the availability of funds."

Please Note: Follow up/Clarification to the Questions and Concerns responses dated 11/17/2026 must be submitted to the General Services Agency via email to bids@gsadoa.guam.gov no later than 5pm, Wednesday, November 18, 2026.
